Mr. David Majors
 651 White Bridge Road
 Meyersville, N.J. 07933

Dear Mr. David Majors:

On December 13, 1990, the Environmental Response Team (ERT) of the United States Environmental Protection Agency (EPA) collected air samples from your house. The samples were analyzed by Electron Microscopy Service Laboratories, Inc. for percent asbestos fibers per concentration.

The results of the asbestos analysis indicated that the samples did not detect any fiber concentration of asbestos.

If you have any questions concerning these results, please contact Pamela J. Baxter at (212) 264-5392.

Sincerely,

Pamela J. Baxter
